PUBLIC BID FOR GLOBAL GOVERNANCE REFORM

AI Should Qualify All Presidential and Government Candidates Worldwide

In the name of fairness, truth, and progress — we, the people of the world,
call for a new era of accountability and intelligence in governance.

If Artificial Intelligence (AI) is advanced enough to determine who qualifies for
loans, credit, jobs, and scholarships — then it is time for the same technology
to be applied to those who seek to lead nations.

We propose that **AI systems be used to qualify all presidential,
parliamentary, and government candidates worldwide** — to ensure only
individuals of integrity, competence, compassion, and verified public service
records are allowed to hold power.

The world has evolved, yet politics remains trapped in deception, corruption, and manipulation.

We can no longer allow human bias and political interests to determine leadership while ordinary citizens are judged by algorithms every day.

AI should now become a **universal integrity filter** — analyzing candidates based on truth, transparency, and verifiable data such as:

- Financial history and corruption record
 - Human rights record
 - Leadership performance metrics
 - Service to humanity
- Mental and emotional fitness for office

If citizens are qualified by AI to receive basic life opportunities, then **leaders must also be qualified by AI** before being allowed to rule them.

This is not about replacing democracy — it's about **protecting it**.
It's about ensuring that leadership reflects wisdom, honesty, and moral strength — not manipulation, money, or media control.

Let the people's data and truth — not propaganda — decide who is fit to lead.
Let AI become the light that exposes darkness in leadership and builds a world where justice and intelligence truly reign.
