**URGENT: Strengthening Nigeria’s Cybersecurity Through  
Coordinated Action and Advanced Encryption Measures**

Dear Sir/Madam,

**To:** The Office of the National Security Adviser, the National Intelligence Agency, the Department of State Services, and All Cybersecurity Companies Operating Within and Supporting Nigeria

Warm greetings,

We write on behalf of **Socio Technologies Limited NG** — **SocioAfrica** 🌍 x **SocioAsia** 🌍 to urgently call for strengthened collaboration and intensified efforts to protect the Federal Republic of Nigeria from the growing wave of cyber threats and attacks.

Nigeria’s expanding digital ecosystem presents enormous opportunities, but it also increases exposure to sophisticated cyber

risks targeting government systems, financial institutions, businesses, and citizens. These threats are evolving rapidly, requiring equally advanced, proactive, and unified defensive strategies.

We respectfully urge all relevant national security agencies and cybersecurity organizations to:

- Intensify monitoring and proactive defense mechanisms against cyber intrusions
- Strengthen inter-agency and public-private intelligence sharing in real time
- Accelerate incident response frameworks to mitigate threats swiftly
- Invest in continuous research and development to stay ahead of emerging attack vectors

In addition, we strongly emphasize the critical importance of **advanced encryption practices** across all systems and infrastructures. Sensitive data, communications, and digital assets must be protected through **multi-layered encryption architectures** designed to significantly reduce vulnerability to unauthorized access.

We encourage the adoption of:

- Robust, modern encryption standards for data at rest and in transit
- Layered security frameworks that combine encryption with authentication and monitoring
- Regular security audits, testing, and updates to maintain resilience
- Continuous improvement of secure coding practices to minimize exploitable weaknesses

The goal is clear: to ensure that critical systems are resilient and that sensitive information remains protected against unauthorized access.

Cybersecurity is not a singular responsibility—it is a shared national duty. The protection of Nigeria’s digital infrastructure directly

impacts national stability, economic growth, and public trust. A united and forward-thinking approach will ensure that Nigeria remains secure, resilient, and globally competitive in the digital age.

Socio Technologies Limited stands ready to support this mission through collaboration, innovation, and strategic partnerships aimed at strengthening national cybersecurity capacity.

We trust in your continued commitment to safeguarding Nigeria and look forward to collective action in addressing these urgent challenges.

**ISSUED UNDER AUTHORITY:**

**The House of Medayedupin**

**Oluwaseun Medayedupin**

**Chairman, Socio Technologies Limited**
