Subject: Formal Notification and Full Disclosure Regarding Unexplained $100,000,000 Bitcoin Deposit Linked to Switzerland (2025–2026)

Dear Sir/Madam,

On behalf of **Socio Technologies Limited**, I am writing to formally notify your office of a significant financial and digital-asset anomaly uncovered during our internal technical and blockchain-monitoring operations, and to initiate the full transfer of our evidentiary findings to your institution.

Specifically, our systems have identified a suspicious Bitcoin deposit valued at **$100,000,000 ($100 million)** that has remained concealed within Swiss-linked custodial or transactional

infrastructure since **2025**, without transparent beneficial ownership or clear public attribution.

Given the magnitude of the funds, the cross-border jurisdictional implications, and the broader risks associated with unattributed high-value digital assets, Socio Technologies Limited has resolved to pursue a policy of complete and immediate transparency. Rather than retaining this intelligence internally, we are formally disclosing the entirety of our technical dossier simultaneously to sovereign governments, anti-money laundering (AML) agencies, financial watchdogs, and accredited investigative journalists.

Summary of Documentation Available for Immediate Transmission:

- **On-Chain Forensic Logs:** Complete transaction histories, wallet addresses, and clustering analyses tracing the deposit activity from 2025 to the present.
- **Infrastructure & Routing Metadata:** Technical indicators linking the custody and movement of the assets to Swiss-affiliated nodes and intermediaries.
- **Chronological Audit Trail:** Timestamped records detailing the detection, verification, and preservation of the digital evidence by our technical team.

We respectfully request that your office designate an authorized point of contact or secure transmission channel so that our compliance and technical personnel can deliver the full, unredacted evidentiary package without delay. Our team remains fully available to brief your investigators, provide technical walkthroughs of the blockchain data, and assist in any resulting inquiries.

Transparency and institutional accountability are essential to safeguarding the integrity of the global financial system. We look forward to your prompt acknowledgment and to cooperating fully with your office on this matter.
